

# STC65+ RS485-Modbus

Bidirectional EnOcean gateways with RS485 interface

**thermokon**<sup>®</sup>  
HOME OF SENSOR TECHNOLOGY

## Datasheet

Subject to technical alteration  
Issue date: 16.10.2024 • A140

### » APPLICATION

Bidirectional gateways with serial RS485 Modbus interface in IP65 enclosure. For connecting EasySens sensors or wireless switches to various controller models with RS485 interface. Transmission of custom programmable telegrams, incl. external receiving antenna (2.5 m).

### » SECURITY ADVICE – CAUTION

The installation and assembly of electrical equipment should only be performed by authorized personnel.

The product should only be used for the intended application. Unauthorised modifications are prohibited! The product must not be used in relation with any equipment that in case of a failure may threaten, directly or indirectly, human health or life or result in danger to human beings, animals or assets. Ensure all power is disconnected before installing. Do not connect to live/operating equipment.

Please comply with

- Local laws, health & safety regulations, technical standards and regulations
- Condition of the device at the time of installation, to ensure safe installation
- This data sheet and installation manual

### » PRODUCT TESTING AND CERTIFICATION

#### Declaration of conformity

The declaration of conformity of the products are available on our website  
<https://www.thermokon.de/direct/en-gb/categories/stc65plus-rs485-modbus>

### » NOTES ON DISPOSAL

The crossed-out wheeled bin symbol indicates that the product or removable batteries must not be disposed of with household or commercial waste. Within the EU, you are legally obliged to dispose of the product separately and appropriately in accordance with the national laws of your country. Alternatively, please contact your supplier or Thermokon Sensortechnik GmbH. Further information can be found at: [www.thermokon.com](http://www.thermokon.com)

## » TECHNICAL DATA

Network technology	RS485			
Communication protocol <i>(type-dependent)</i>	Modbus (RTU / ASCII) RS485 bus load: 1 unit load according to RS485 standard (max. 32 devices)			
Radio technology	EnOcean (IEC 14543-3-10), transmission power <10 mW			
Frequency	868 MHz			
Antenna	external transmit- / receive antenna			
Data transmission	bidirectional			
Receive- transmit channels	32 (Rx) + 32 (Tx) + 32 (VA)	Rx = Recipient channels	Tx = Transmission channels	VA = Valve actuators
Power supply	15..24 V = (±10%) or 24 V ~ (±10%) SELV			
Power consumption	typ. 0,8 W (24 V =)   2 VA (24 V ~)			
Enclosure	enclosure USE-M, PC, pure white, cover PC, transparent			
Protection	IP65 according to EN 60529			
Cable entry	M25, for wire max. Ø=7 mm, seal insert for fourfold cable entry			
Connection electrical	terminal block, max. 1,5 mm <sup>2</sup>			
Ambient condition	-20..+60 °C, max. 70% rH non-condensing			
Weight	without antenna 110 g			
Delivery content	external transmit- / receive antenna 2,5m			
Notes	up to 15 devices with Smart Acknowledge (SmartACK), magnetic antenna holder required for better radio range			

## » MOUNTING ADVICES

The module enclosure can be mounted directly onto a DIN top-hat rail using the mounting base or surface-mounted using dowels and screws.

- The antenna should be mounted at metallic objects, e.g. at an air tube behind a false ceiling or on a metal plate (minimum dimensions: 180 mm x 180 mm, material: galvanized sheet steel, see accessories).
- In rooms the antenna should be at least 10 cm away from the ceiling.
- The antenna should be vertically aligned downwards.
- Minimal distance to the wall: 10 cm.
- Distance to other transmitters (e.g. GSM/ DECT/ wireless LAN/ EnOcean sender): at least 0,5 m.
- The antenna cable shall be wired in an electric conduit.
- A crushing of cable shall be absolutely avoided.
- The minimal bend radius of the extension cable is 50 mm.
- As for the cable laying the use of an active pull-up device should be avoided, so to avoid any damages on the sheathing respectively on the connectors.

## » COMMISSIONING

Radio sensors send time or event controlled telegrams to the receiver. The receiver verifies the incoming telegrams and output them directly via their interface. Each telegram allows a precise allocation and consists of the format: type of the telegram, data, sender-ID 32bit.

In order to assure a correct evaluation of the measuring values by the receiver, it is necessary to have the devices learned by the receiver. This is done automatically by means of a "learn button" at the sensor or manually by input of the 32bit sensor ID and a special "learning procedure" between sender and receiver. The respective details are described in the corresponding software documentation of the receiver.

## » LED ERROR CODES

PWR	BUS	RAD	ERR	
■		X	●/■	faulty bus communication
○	●	○	●	faulty dipswitch setting
○	○	●	●	Error radio module

■ LED flashes

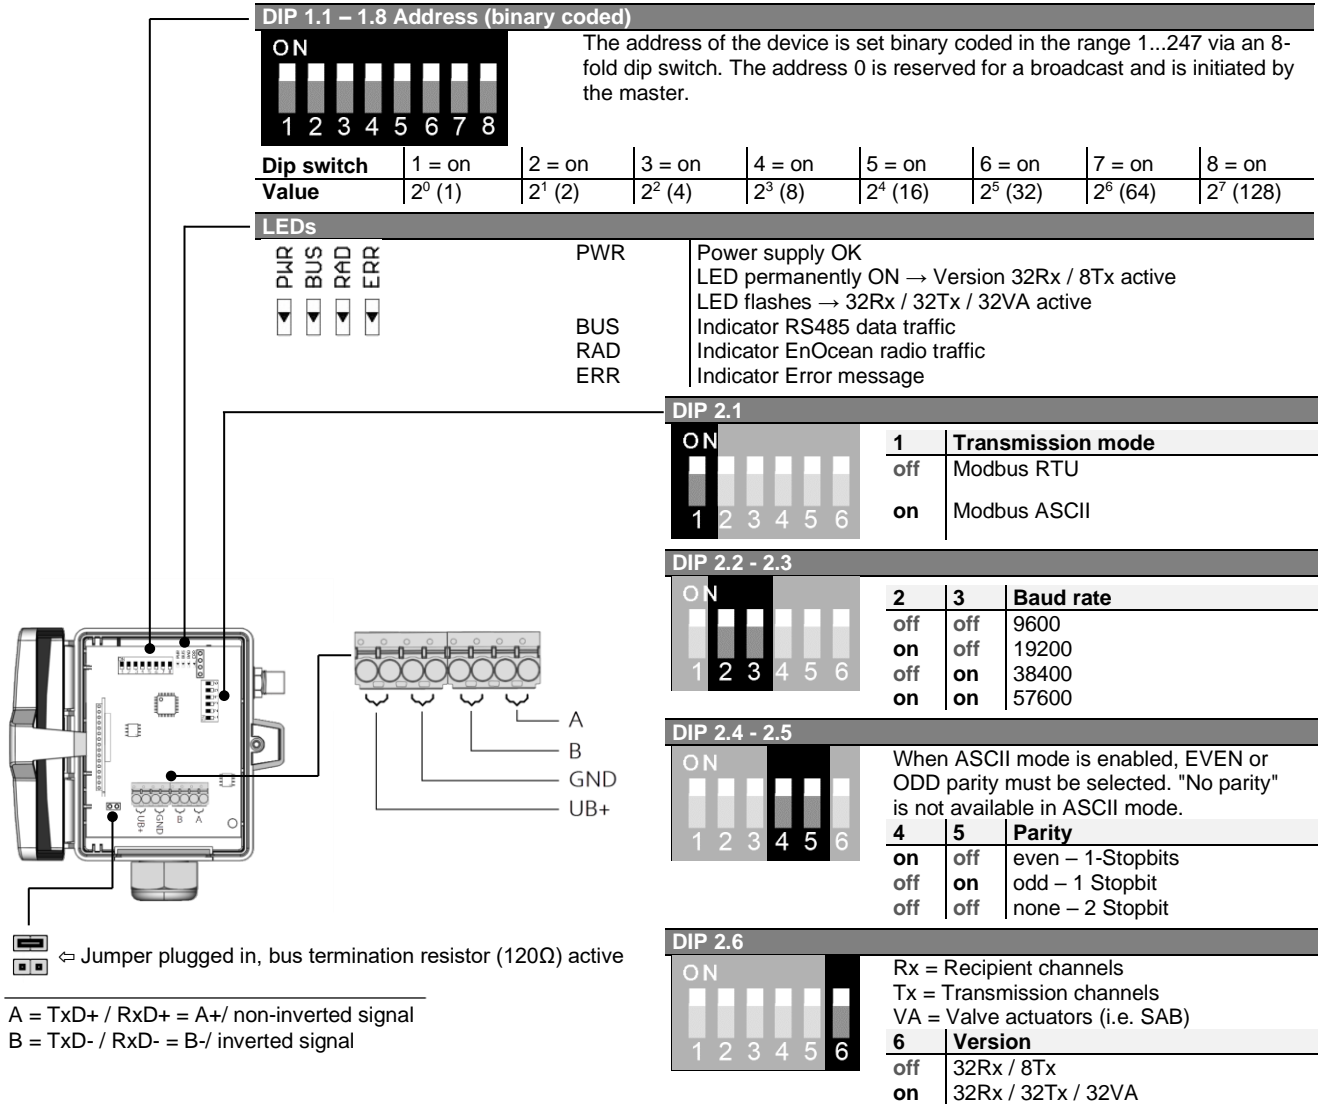

● LED permanently ON

○ LED OFF

X not relevant

» CONNECTION CONFIGURATION - STC65+ RS485-MODBUS

Factory default: RTU, Address 1, 9600Bd, Parity even, Version 32Rx/8Tx

Interface description/ register specification

The configuration software and further information for parameterization of the Modbus gateway is available for download under the following link. Pay attention to the configured version. Depending on the setting (DIP 2.6), the appropriate documentation must be called up:  
<https://www.thermokon.de/direct/files/stc65-rs485-modbus-configsoftware.zip>

» INFORMATION ABOUT EASYSSENS® (RADIO) / ENOCEAN GENERAL INFORMATION

**EasySens® - EnOcean**  
 Basic information about EasySens® radio and installation are found on our website.  
<https://www.thermokon.de/direct/files/information-radio-airconfig-en.pdf>

» OVERVIEW OF THE RADIO TELEGRAMS

**EEP**  
 The structure of the data contained in the telegram can be found in the EEP (EnOcean equipment profile) list provided by the EnOcean Alliance.

» INFORMATIONEN ABOUT EASYSSENS® - AIRSCAN

**EasySens® - Airscan Radio Signal strength measuring software**  
 Basic information about EasySens® - Airscan and installation are found on our website.  
<https://www.thermokon.de/direct/files/airscan-easysens-datasheet-en.pdf>

## » INFORMATION ABOUT SMART ACKNOWLEDGE (SMARTACK)

This bi-directional communication mechanism also allows the building system to send back data to a sensor, i.e. to overwrite SR06LCD's set point. Smart Acknowledge requires that both communication devices do support the Smart Acknowledge mechanism.

Communication must be performed directly with a SmartACK capable receiver, e.g. STC65-FTT LON (SMACK special version) or STC65+ RS485 Modbus/EVC. Repeaters are not supported, they delay in the telegram transmission. Sensor and gateway must communicate directly with each other.

Additional Information of the used EEP's with Smart ACK can be found using the following link:  
<https://www.thermokon.de/direct/files/smartack-info-en.pdf>

## » DIMENSIONS (MM)

## » ACCESSORIES (INCLUDED IN DELIVERY)

Mounting base  
 Mounting kit universal  
 • Cover screw + screw cover • 2 Rawlplugs • 2 Screws (countersunk head) • 2 Screws (rounded head)

Item No. 631228  
 Item No. 698511

## » ACCESSORIES (OPTIONAL)

Airscan USB Enocean Transceiver (868 MHz)  
 Antenna extension 10 m  
 Antenna extension 20 m  
 Antenna holder form L, 180x180 mm  
 Rawl plugs and screws

Item No. 566704  
 Item No. 257206  
 Item No. 257213  
 Item No. 255097  
 Item No. 102209
